About Us

We are competent Oil Field/Industrial Training and Supply Chain Experts who strive to provide a multitude of services related to consulting, supplies, and inspection.

At Neotek Inovasi Global, we aspire to enhance and improve our client's performance. We provide a full range of courses such as technical training for multiple specialities and fields, HSE, Leadership Management and Development, and Oil and Gas Courses based on industry standards.

We also provide services in Inspection and Supply Chain that follow international and local standards with high service quality and efficiency.

Vision and Mission

To provide the best-in-class training, Supply Chain, and Inspection services as a Global service provider.

We aspire to establish the future leaders of the industries and develop a skilled and competent workforce by utilizing international, national standards and well known industry accreditations.

We also strive to establish and develop services and supplies that solve our customer's challenges using the world's most exemplary industry standards.

Chairman's Words

At Neotek Inovasi Global, our training and consulting services flourish through our multinational team of highly experienced, knowledgeable, and professional instructors and consultants. In the scope of the training industry, teaching and delivery of knowledge has extremely developed, with the development of knowledge delivery, the execution must also change, considering the wide spectrum of trainees.

Therefore, we are continuously modifying and upgrading our training KPI's to suit the needs of our trainees and the ever-flowing circulation of knowledge and new curriculum. Education must be sought with great strides of enthusiasm. As a training provider, we strive to not only provide innovatively methods of training but also allow trainees to gain more skills from their training in a creative manner.

Whether it be through technical knowledge, hands-on experience, or personal gain, Neotek Inovasi Global encourages its participants to have a remarkable training experience through their involvement, which will ensure value addition to their practical and personal life in the short term and long term. On behalf of Neotek Inovasi Global Executive Board and our training professionals around the world, we look forward to understanding our clients' needs, delivering training that meets those needs, and supporting our candidates as they pursue their career goals.

About Us

Our backgrounds are in both, with a combined total of more than 15 years of training and consulting expertise. We have worked in Algeria, Malaysia, Indonesia, Thailand, Brunei, Kuwait, Oman, the United Arab Emirates, Mauritania, Nigeria, Egypt, Bahrain, India, Pakistan, Turkey, Iran, Iraq, and Sudan, among other countries. After years of experience in these varied fields, we've decided to provide consultancy services to these areas.

Why do you need to select us as your business partner ?

We understand that completing a project requires more than a strategy; it need people and someone to manage that plan. These individuals are our most valuable resource.

Our reputation is built on offering just the best consultants with the best experience and attitudes. This is accomplished through the recommendation and provision of qualified, goal-oriented individuals for our clients' initiatives. Our experts assist in bridging the engineering-operations divide.

Drilling Operations • Completion Operations

We want to be present for the duration of your well's completion. Our drilling and completion consultants assist our clients in achieving excellence by operating safely and effectively. We understand how critical it is to keep costs down when bringing wells online.

That is why we take pride in assisting our clients in completing their wells on time and within budget. Consider how our experience and communication skills might help you optimize your operation.

We offer customized training and consultation services designed to meet your specific requirements. Each program is tailored to align with your industry needs, operational goals, and professional standards.

Tubular Items Inspections for
OCTG, Drill Pipe & BHA

Lifting Equipment Inspection

Advanced NDT Services

Rope Access Techniques

Dropped Objects Survey

Neotek Inovasi Global Rig Inspection Services are types of the General Risk Based Inspection (RBI) and strictly conducted in accordance with the industry standards and recommended practice such as API, IADC, ASNT, AWS, ANSI, ASME and OSHA as well as the recommendations of Original Equipment Manufacturer (OEM) to ensure safety, reliability and durability.

Neotek Inovasi Global Rig Inspection Services provide analytical traceable Rig Action Tracker (RAT) with ranking criteria of the defects as per Risk assessment matrix for the critical items which may lead to loss of life or serious injuries, major for items which may damage the assets or harm the environment or minor for those defects which may cause down time for the operations and reported with statistical Analysis for open and closed items and the recommendation for the corrective action based on the best recommended practices and international standards or customer specific requirements to deliver the most effective audit system to ensure that drilling contractors and drilling rigs have the ability to maintain the highest performance.

WE WILL HELP YOU TO:

- Monitor the condition of your rig equipment
- Detect and locate internal and external corrosion, pitting, cuts, gouges, wall loss, and fatigue cracks before they result in severe damage
- Ensure the operational integrity of your rig and comply with the latest regulations and standards
- Manage safety cost-effectively through comprehensive inspection and risk ranking
- Deploy the most appropriate action for damage that cannot be detected in advance
- Predict and avoid potential failures

OUR RIG INSPECTION SERVICES INCLUDE:

- Full Condition Survey
- Routine Rig Audit (Rig Acceptance / Pre-spud Test)
- Planned Maintenance Schedules like Cat III and Cat IV
- Accident Incident Investigation and Root Cause Analysis with recommendations for the corrective actions
- Stress and structural analysis for unidentified Rig structures
- Corrosion survey and painting inspection
- Dropped objects Surveys
- Rope Access techniques

RIG EQUIPMENT INSPECTION CAT III & CAT IV:

In collaboration with our partner, , one of the leading companies in rig manufacturing and refurbishment, We Conduct Cat IV Inspection for Rig Equipment like TOP Drive systems, Hook blocks, Kelly systems, Rotary tables, Mud pumps, Draw works, Derrick and Substructure and Tubular handling tools (Handling tools) as per API Recommended Practice like API RP 8B, API RP 7L, API RP 4G and OEM Recommendation to detect any defects like cracks or wearing and do the recommended repair or replacement as applicable.

Provide the spare parts needed, perform all required NDT and after re-assembly of the equipment we do all tests required then issue the COC certificate of Compliance with the Data Book as a permanent record in the Equipment File.

Neotek Inovasi Global Provides wide range of inspection activities and Services for various industries rather than Oil & Gas like Petrochemicals, Fertilizers and Construction.

1. Non-Destructive Testing (NDT)

NDT is considered as the core job for inspection services as each kind of inspection rely on verifying that neither cracks, wear nor elongation have be progressed as a result of induced stress of operation this beside the good condition, dimensional and functionality verification. These services are as follows:

- | | |
|---|---|
| a) Magnetic particles inspection (MPI) | e) Radiographic Testing (RT) |
| b) Electromagnetic inspection (EMI) | f) Eddy Current Testing (ET) |
| c) Ultrasonic thickness measurements (UT) | g) Remote Visual Inspection / Borescope |
| d) Dye penetrant inspection (PT) | h) Phased Array Ultrasonic (PAUT) |

2. Tubular Items Inspections for OCTG, Drill Pipe & BHA

Neotek Inovasi Global provides Inspection for all sizes and types of Drill pipe, BHA and OCTG (Tubing and casing) using the international standards and codes API and rely on the conventional and advanced NDT like (MPI, UT, RT, EMI and RVI).

3. Advanced NDT Services

Neotek Inovasi Global provides the latest and advanced NDT services for the following:

- a) Tank Inspection (MFL, RMS, AE and online Robotic Inspection)
- b) Pipe Line Inspection (Long Range Ultra sonic Testing -LRUT)
- c) Heat Exchanger Tubing Inspection (RFT, NFT, MFT, ECT & IRIS)
- d) Insulated Component Inspection (Pulsed Eddy Current Test)

4. Lifting Equipment Inspection

Using the international standards and codes BS, ASME & ISO, LEEA (Lifting equipment Engineering association) & NSL (North Sea lifting), we provide thorough examination and testing for both types of Equipment (Lifting Appliances & Lifting Accessories)

5. Rope Access Techniques

Neotek inovasi global Provides Rope Access services through certified experts in the field of Rope Access Techniques with IRATA levels I, II & III. We believe using rope access has a number of benefits over scaffolding or cranes as Rope access is adaptable to almost any situation onshore and offshore. Also Rope access is relatively fast to set up and dismantle, thus increasing the inspection time window.

6. Dropped Objects Survey

Neotek inovasi global Provides Dropped Objects Survey services using the DROPS recommended practice codes, Areas that we typically cover on a full survey can include but not limited to: Derricks & Masts, Jack House & Legs, Rig Equipment, Deck & Gantry Cranes, Leg Columns, Flare Stacks, Helideck Structure.
